EAST BRAINTREE.

ORTGAGEE'S SALE.

one of a power of sale contained
in a certain mortgage held by
John H. French, Jr., of Braintree,
Mass., for the payment of debts, Book 827, page 356, and
for the payment of the conditions of said
mortgage and for the purpose of fore-
closing the same, will be sold at public
on the premises hereinfor-
on the nineteenth day of July,
1899.

At the time of sale, all and
the premises conveyed by said
mortgage and therein substantially
as follows:

one-half acre of
land, the same
being in Weymouth and
situated in said Weymouth,
and for the payment of debts, Book 827, page 356, and
for the payment of the conditions of said
mortgage and for the purpose of fore-
closing the same, will be sold at public
on the premises hereinfor-
on the nineteenth day of July,
1899.

At the time of sale, all and
the premises conveyed by said
mortgage and therein substantially
as follows:

one-half acre of
land, the same
being in Weymouth and
situated in said Weymouth,
and for the payment of debts, Book 827, page 356, and

A GREAT COPPER FIELD.

Thousands of Acres of Rich De-
posits.

The Property of the Boston and Texas
Copper Company. Its Romantic History
and Discovery.

In 1862, during the late Civil War between
the states, when almost every man in the
state of Texas, between the ages of 16 and 45,
was in the army, the metal was suddenly
discovered in the hills of the state, and
the Federate Army, and the Comanches and
Apaches Indians made frequent forays
into what is now the most prosperous
and populous section of Texas. Col. J. B.
Barry, in command of a battalion of Texas
rangers, pursued these predatory
savages into what is now Archer Co.,
then a beautiful prairie, terra incognita
to the world, and the metal was suddenly
discovered in the hills of the state, and
the Federate Army, and the Comanches and
Apaches Indians made frequent forays
into what is now the most prosperous
and populous section of Texas. Col. J. B.
Barry, in command of a battalion of Texas
rangers, pursued these predatory
savages into what is now Archer Co.,
then a beautiful prairie, terra incognita
to the world, and the metal was suddenly
discovered in the hills of the state, and
the Federate Army, and the Comanches and
Apaches Indians made frequent forays
into what is now the most prosperous
and populous section of Texas. Col. J. B.
Barry, in command of a battalion of Texas
rangers, pursued these predatory
savages into what is now Archer Co.,
then a beautiful prairie, terra incognita
to the world, and the metal was suddenly
discovered in the hills of the state, and
the Federate Army, and the Comanches and
Apaches Indians made frequent forays
into what is now the most prosperous
and populous section of Texas. Col. J. B.
Barry, in command of a battalion of Texas
rangers, pursued these predatory
savages into what is now Archer Co.,
then a beautiful prairie, terra incognita
to the world, and the metal was suddenly

ADVERTISEMENTS inserted at the usual rates.

Correspondence and news items, etc., should be sent to the editor, or to the publisher, or to the managing editor, or to the managing editor of the Weymouth Gazette.

While we have no objection to regular contributions, we do not wish to interest the editor in things they cannot get. Let your interest in your local news and pride in your town lead you to make the Gazette the most bright and newsy.

ENTERED AT THE POST OFFICE AT W. E. M. H. W. M. AS A SECOND-CLASS MATTER.

FRIDAY, JULY 14, 1899.

THE MARK is often made at this time, next that it is shown to talk politics, and yet great and important events are not the work of a day, and work leading up to a culmination of any affair of importance must be pushed along regardless of spinner's heat or winter's cold and the most important affair in connection with the coming political campaign in Massachusetts is that of the choice of lieutenant governor.

The position of lieutenant governor is itself a most interesting one, and the man who is chosen as the legitimate successor of the governor himself and should invariably be selected from those currently fitted to fill that important position. Among those mentioned for the coming campaign no one in the Commonwealth comes near the ideal than the Hon. John L. Bates, for three years speaker of the house of representatives.

While among the very young men who have filled the various positions of trust, he is shown himself to be a man of decided executive ability and has won the confidence and respect of all who have sat under his administration, or witnessed his work, and in entering the campaign he does so with a record which should go far in placing him in the list of most desirable candidates.

As a man who has made a study of all the departments of state he has few equals, and should circumstances at any time remove the head of the Commonwealth, he is well fitted to fill the office.

While a Republican by birth, Mr. Bates is at the same time broad and conservative and in the position which he filled with sound credit and honor has always been frank and considerate of the rights of those who might differ with him.

Pennsylvania and New York have political machines which are sound and are manipulated by the man at the lever; fortunately for Massachusetts her politics have been, for a longer period and will continue to be kept as long as the intelligent people of the state watch with care and interest.

Whether Mr. Bates has been called before the people, he has shown a marked ability far above the average in the discussion of important events, is a clear and logical reason and free from cant and stale anecdotes.

Thus far in the campaign, indications point strongly to Mr. Bates' victory, and from all parts of the state there are encouraging voices, and the people are looking forward to a bright and glorious future.

What is now to be done?

What is to be done?

Did You Ever See the Like?

You never did, and may never again. Just think of this.

J. M. ALEXANDER, Manager.

WEYMOUTH and EAST BRAINTREE

—John E. Nash has returned from a two-months business trip through the west in the interests of his firm, H. Miller, Volting & Co., Boston.

—The School of Art, Miss Lewis from Portland, with other girls, arrived at H. Miller & Co.'s, on Thursday afternoon.

Flowers for the W. C. T. U. flower mission may be left with Mrs. Neal, Summer street, this (Friday) afternoon and evening.

—Fred H. Hall and family are residing at Fort Point.

—D. J. Connell of Boston was the guest of his brother of J. E. Connell over Sunday.

—A novelty at Harlow's is an electric cigar lighter.

—Alfred Spear has moved into the James H. Elliptical place on the corner of Franklin and Franklin streets.

—Miss Thorne's visiting relatives in Maine.

—Harry Clinton was thrown from his wheel Tuesday evening, and sustained several bruises about the head.

—Miss Florence Sills is the guest of Marlow's friends.

—Ernest Vaughan is entertaining his cousin, Ralph Morton of Cleveley.

—Misses Alice and Susie Dorothy of Weymouth spent Sunday in town, the guests of Miss Irma Skilton.

—Misses Emily and Beatrice of Weymouth are visiting relatives in Somerville.

—Mrs. Oliver Fuller has returned from a visit to relatives in Somerville.

—The Norfolk have received their new suits, which, by the way, are very neat looking. In the future the chit will play more but uniformed chits.

—The Union Church will be closed during the month of August. The W. C. T. U. will hold their meetings in the Sunday School room at 5 o'clock.

—Joseph Gould of Fitchburg has been visiting friends in town this week.

—Mr. and Mrs. Patrick Corrigan are receiving congratulations upon the birth of a daughter.

—John Hart has taken a position as manager of the Weymouth street.

—Mr. and Mrs. Remond Hurrell of Washington street have returned from an extended western trip.

—Mrs. John Holbery, who has been quite ill, is convalescent.

—Ernest Lord of the navy has been in town this week.

—The new 600 horse-power engine recently placed in position at the power station of the Braintree and Weymouth Street Railway Co. was started Friday night.

—Arthur M. Raymond officiated at the organ at the Union Church, and Percy E. Baker rendered several solos in his usual pleasing manner.

—The First River Engine works received a new mill and a machine which have been placed in the machine shop this week.

—Mrs. H. S. Snyder has returned from an outing at Lake Chaplin.

—Joseph Barrett has taken a position at G. H. Blackwell & Co.'s.

We are always in receipt of copies of regular news, either from our own correspondents, or from others, that are much interested than the nature of things, they cannot get. Let your interest in your local paper be known in your local leadson said in making the Gazette more bright and newsy.

ADVERTISING AT THE LOWEST RATES.
WEYMOUTH, MASS., AS A SECOND CLASS MAILER.

FRIDAY, JULY 28, 1899.

CHEAP MONEY is a queer expression, but still it is a great fact which is confronting bankers and investors today and by it nearly all of our Savings Banks have been compelled to reduce their rates of dividends and our National Banks their capital stock. Money is cheap when a municipality like Boston can put \$100,000 of bonds on the market and have them sold at a rate of interest of 4.5 per cent, and so it is with other towns about 2 per cent, and this is where the short pluses in regard to a shrinkage in personal property. Such bonds pay no municipal tax and consequently real estate must come in and bridge over the chasm.

The work of the Assessors for the current year is far completed, that the tax rate will be \$200 on the thousand. The property tax is the highest high watermark of two years ago, but it is a marked advance over last year and the property will naturally be higher.

There is but one answer to the inquiry large expenditures and the old story, a large reduction in personal property, which for this year is \$70,000. We go on each year gaining a little in real estate, it has been the case it has been more than offset by the loss in personal and no means seems to be able to reach this, either in Weymouth or any other town.

The question has been brought to the assessing officer, how is he to proceed, according to the assessors, doing some good, but still the situation goes on.

Good Old Gazette.
Good will for the good old Gazette that never was so good as now. L. H. Fiske

Cit. Hall, As a Candidate.

People are now forming their opinions of the respective qualifications of the two candidates for the office of mayor, and a few words regarding Col. Guild may not be out of place in this connection. Col. Guild is a man of very marked ability, fine scholarship, and is a good business man. He is one of the best informed men in New England upon questions of public policy. The colonel is an eloquent and forceful speaker and has been one of the senators most sought after of the Republican party in recent campaigns. The popularity of Col. Guild is being evidenced every day, and it is to be hoped that saying anything derogatory of any other candidate we may say, that his selection as the republican candidate for lieutenant governor would be eminently pleasing, we believe, to the people.

Representatives.

E. W. Hunt, whose likeness and sketch we presented to our readers last week is announced as a candidate for the legislature this fall. Mr. Hunt is a popular young man and if nominated by the republicans and elected will make a faithful, bright and worthy representative of this district.

In the democratic party, Mr. Whelan will be a candidate for reelection with the strong prestige of last year's success to aid him in the race.

The republican legislator of the past two years, M. F. Hawes, is strongly urged by his friends to be a candidate for reelection.

We have heard of neither announced candidates but among the republicans, but there may be others names presented later.

In the democratic party, Mr. Whelan will be a candidate for reelection with the strong prestige of last year's success to aid him in the race.

The republican legislator of the past two years, M. F. Hawes, is strongly urged by his friends to be a candidate for reelection.

We have not learned whether Braintree will have a republican candidate this year if there will be two from Weymouth. Mr. Mellen, who was unsuccessful last year would be a perfect legal Braintree candidate this year, if he desires an opportunity to return his unfortunate failure of last year to a success.

Col. Braintree has not had a representative candidate for some years and among his goals legislative timber to be found, but he does not have a candidate for reelection.

We have not learned whether Braintree will have a republican candidate this year if there will be two from Weymouth. Mr. Mellen, who was unsuccessful last year would be a perfect legal Braintree candidate this year, if he desires an opportunity to return his unfortunate failure of last year to a success.

Food Adulteration.

What the Dear People Eat in Great

Trials.

The following article in the Youth's Companion is bearing of more than passing attention if the people of this country are to retain any degree of health. The Companion says:

Official investigations show that the adulteration of food has reached alarming proportions in the United States. The Department of Agriculture has found salicylic acid in fifteen out of twenty samples of string beans, in new out-of-towners and dried beans in twenty-four out of twenty-four samples.

The Committee on Agricultural Experiment Station found starch, glucose, and salicylic acid in thirty-seven out of forty samples of fruit jellies, jams, and jellies.

The chemists of the Wisconsin Dairy and Food Commission reports an alarmingly frequent use of antiseptics to preserve meat, milk and butter. Many of these food adulterants are actively injurious to health and even those that are harmless are a fraud upon the public.

The state or national officers who make these investigations ought to be given power to publish all details, with the names of offending manufacturers, and severe penalties should be provided

ENJOY THEMSELVES.

Grocers and Clerks Picnic at Salem Willows.

Order Not Dampened by the Rain.

That grocer is ignorant, and Weymouth grocers in particular are a folly, for was made evident at the annual picnic of the old colony grocers I mentioned at Salem Willows, Wednesday.

For six months it had not rained harder than on Wednesday morning, but although the sound of the swiftly falling rain that fell upon the ears of even grocers who work, was not caused by the rain, it was a great relief within him, for he determined to make the best of it, that the grocers have become accustomed to picnics on rainy days, and had the day, planned clear and bright, it is doubtful whether the change would have agreed with the grocers.

The party, consisting of over two persons, left Weymouth Wharf at about 9:45 o'clock. The down trip occupied nearly two and a half hours, and was filled with the usual gaiety and fun, and the men, who were sufficiently strong, had the grocers' special cook.

The camp will not be broken until Wednesday August the second, and is earnestly hoped that the public will visit the grocers before it is too late.

The drill master Lieutenant Smith is well known in this town as a prominent member of the Sons of Veterans.

For the convenience of the public we print a program of the day's events.

Oldary Mrs. Nellie E. Lovell.

Mrs. Nellie E. Lovell, widow of George Lovell, and a well-known resident of North Weymouth, passed away Saturday morning at her home on Bridge street of Lemontechia, aged 31 years.

Deceased was a native of Mexico, and resided in Weymouth for many years, where she was an earnest church worker and a member of Dr. Newell's church.

She was a highly distinguished lady.

The first mentioned camp was composed almost entirely of Weymouth clerks, and although the crowd at first seemed inclined to look upon the game as a farce, they soon saw that the clerks were far from being slow. The impulsive were E. W. Hunt of Weymouth Landing and Mr. Bain of Weymouth, the former being a young man of 18, the latter of 21, and the two close at the head of the fifth inning.

The features of the game were a beautiful catch by Ernest Phillips of Phillips & Bacon, who covered first base, and also a play by Ben Hunt, who was far more popular with the younger set.

Funeral services will be held from her home this afternoon, Rev. T. H. Vincent will conduct the services.

CADETS IN CAMP AT BAYVIEW, NORTH WEYMOUTH.

THE ROCKING ROCK.

BASE BALL.

Rangers 21, Weymouth 2.

The Lake Street base ball field at East Weymouth was the scene of a fielding contest last Saturday afternoon as the contest went on between the rangers of East Weymouth and the Walthams. The home team, however, was far ahead of its opponents in its makeup and work, as will be seen by the following score:

wood, etc., whether Silk, Satin,

Cotton or Wool.

Sold in All Candy, Grocers and
Druggists, or mail order for
15 cents.

Address, THE MAYPOLE SOAP COMPANY,
127 Diana Street, New York.

THE MAN IN THE HOLE.
A gentleman who lives in Iowa has
wished to us, after long correspondence,
to have his name inserted, and which
moreover, according to his notion, shows
that people are entitled to have their
names inserted. He has furnished a complete
diagram of the meaning which the words
"the man in the hole" have in his mind.
We think it necessary. At all events
we shall content ourselves with the present
and let the author of the diagram know that
the reader will be able to arrive at a proper
understanding. It without any help
from us. He is a man in our town.
There was a man in our town.
What would he do if he were in our
house beneath his feet.

A teamster had delivered coal
and when turned out to pay
the bill, he found the door open, so
there was the chance to pay.

The man who hurried never
paid the bill, so the master comments as
he disappeared, "The said."

Now comes the meat of the tale:
A certain man, who had been
drinking, went into the street, as cyclones do,
and never stopped to rest.

The coal man and his team were first.
The man who had been drinking,
and who was in the hole, was last.

But he who had seen the hole,
and so had the coal man, had
done all he could do just
about as good as new.

Keep back the things that thou wouldst
say.

What! Steel seems harsh with thee;
It may turn out the other way,
So wait awhile and see.

A Singular Escape

By F. M. Colby

BRIGHT and yellow rose the sun over
the white icy fields—such a scene
as there was something in the northern land. There was something
in the ringed grandeur of the scenery,
in the whiteness of the snow, the blackness
of the rocks which peeped out from
the cyclone, in the wreath of the light
of the atmosphere, and, above all, the
impressive silence, which seemed to have
affected hitherto the sense of a stranger.

From Report of Prof. W. F. Cunnings, former State Chemist of Texas.

Such numerous outcrops of copper ore have been tried over the same field
of these hills that out of 12,000 acres of land which the company own, hardly
a 100 acre tract should be found which does not contain some copper.

A certain number of veins upon the hill side, and
one vein which is 15 feet wide.

The property has a historical character and a record in the State Geological
Reports. It has been examined and reported upon by the highest engineering,
geological and expert authorities, and its merit and value are established beyond all
question. It is not an experiment, nor its value speculative, they are proven and
demonstrated.

From Report of Prof. Wm. DeRee, former State Chemist of Texas.

Such numerous outcrops of copper ore have been tried over the same field
of these hills that out of 12,000 acres of land which the company own, hardly
a 100 acre tract should be found which does not contain some copper.

A certain number of veins upon the hill side, and
one vein which is 15 feet wide.

The property has a historical character and a record in the State Geological

geological and expert authorities, and its merit and value are established beyond all
question. It is not an experiment, nor its value speculative, they are proven and
demonstrated.

From Report of Prof. W. F. Cunnings, former State Chemist of Texas.

In order that I might see the condition of this hole after this amount
of work had been done, I employed a few hands and cleaned out the tunnels
which I found a hole of copper. This is the disulfide of copper and will yield
as high as 50 per cent of copper. I drove the tunnel twenty feet further into the
hill, following the hole. When I had gone about twelve feet I struck
a ledge of copper eighteen inches east and six inches below the second ledge. These
two more or less than a hundred feet apart, which seems to be the second hole. I immediately
began to remove the rock over the hole, and the lower and wider, the
lower and wider, is a stratum of copperiferous marl-schists extending the entire width
of the tunnel, say four feet, and is probably much wider. This marl will yield
about 15 per cent of copper.
